Office Action Summary

Art Unit: 2777

1. This application has been examined. Claims 1-18 are pending.
2. Acknowledgement is made of applicants' claim of domestic priority based on provisional application numbers 60/069,157, filed December 9, 1997 and 60/059,939, filed September 26, 1997.
3. The Information Disclosure Statements filed January 11, 1999 and April 1, 1999 have been received and considered. See attached forms PTO-1449.
4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
5. Claims 1-18 are rejected under 35 U.S.C. § 102(e) as having been anticipated by U.S. Patent No. 5,627,979 issued to Chang et al (hereafter Chang).
6. Chang anticipated the claimed method and computer program for providing access to and interfacing an object oriented software application with a relational database. In particular Chang

Art Unit: 2777

disclosed the generation of a schema map for mapping the attributes and inheritances of classes of objects (as claimed in claims 2-7 and 11-16) as described in Section 2 of the patent. Additionally as claimed Chang utilized an interface object derived from the mapping to access the relational database (as claimed in claims 1, 8, 9, 10, 17 and 18).

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

8. Claims 10-18 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. According to the Examination Guidelines for Computer-Related Inventions, 61 Fed. Reg. 7478 (1996), computer programs per se are not statutory subject matter. The Guidelines indicate that a claim to simply a "computer program" that does not define the invention in terms of specific steps to be performed on or using a computer should not be classified as a statutory process. Because claims 10-18 relate only to "routines" they are not seen to define specific steps to be performed and are therefore considered non-statutory.
